An addition to Vicoustic's Flexi Panel A family, the Flexi Panel A40 is truly effective when applied in any type of space. A scientific combination of material, absorption surface and cavity thickness means that the panel's absorption performance is extremely efficient in the treatment of first reflections.

Flexi Panel A40 offers you the best performance on medium and high frequencies, this panel represents an adaptation to the industrial sector, providing one of the best acoustic solutions on the market, at an attractive price. It also has a unique characteristic - when placed in a sequence, the panel junctions become undetectable, allowing you to place a continuous pattern on large surfaces.

Flexi A40 Tech Premium - (Vicoustic Tech Premium) :

Made of Basotect® foam, it's long-term resistance to high temperatures and excellent fire characteristics are based on the use of melamine resin. The high nitrogen content of the resin is responsible for the extremely flame-resistant property of the foam without the need for fire retardants, making it particularly suitable for applications with high fire safety requirements..

#### Features:

- Innovative design
- Easy to install
- Unique Vicoustic technology
- 4 cm Thickness

Available in two different foams (Vicoustic Foam and Vicoustic Tech Foam) and in 8 different colored fabric (Brown, White, Blue, Orange, Beige, Bordeaux, Grey and Black).
