The revolutionary Flexi Wave acoustic panel, brings performance and design to our homes. Especially developed to fit in standard clip-in or T-Profile frames, this is the only non square or rectangular tile that fits in standard ceiling frames.

There are available also two other fixation systems for free installation in walls and ceilings. This hybrid acoustic panel acts as an absorber and diffuser simultaneously. Very easy to install, they hook on to the existing frames but can also be glued directly to flat surfaced ceilings. The acoustic foam and fabric can be removed for cleaning or replaced in a different color. The Flexi Wave is the ideal product to improve the acoustics and decor of your home cinema, hi-fi room, but can also be used as a design feature.

This acoustic panel is ideal for residential installations, cinemas, restaurants, or on it's own, as a decorative piece. The frame is made of wood, available in black, white, or a natural wood finishes. The panel is fit with acoustic foam, covered with premium fabric that comes in 8 different colors.

Besides the standard finishes, we also accept quantity orders for custom finishes, where you can pick the exact wood and fabric finishes for your specific design.

Vicoustic Flexi Wave is available in 2 versions, the full size 4 foot panel (1200mm), and the smaller 2 foot panel (600mm - half Flexi Wave). Interesting designs can be developed when both versions are combined.

Please notice that the dimensions of this panel have a tolerance margin of ± 3 mm

Main Info

Ref: B00880
EAN13: 5600301854941
HS-Code: 44101110
Dimensions: 1200.0 x 100.0 x 155.0 mm
Scratch Resistance: No
Washable: No

Performance

Functionality: Hybrid
Absorption Frequency: Medium
NRC: 0.000
Fire Class European (EN): Euroclass F
