

Vari Bass

Page 1 of 1 |

Required Apparatus:

- Vari Bass
- 2 x Screws

Installation Instructions:

Be careful placing the screws and moving the foam structure.
Do not move the foam structure when the screws are tightened.
Make sure the room has all the conditions necessary to receive the acoustic products.

STEP 1

The Vari Bass consists of a cylindrical box and a cylindrical foam within the same. Set the high to reach the desired frequency, based on the frequency graphic ruler.

STEP 2

When the product is correctly positioned, place and fix the screws in the designated positions located in the cylindrical box. The screws will fix to the foam and assure the product stability.

Do not try to change the product working frequency when the screws are fixed because you can damage the product. To change the foam position remove the screws and repeat the process.
