With the Wave Wood design a new diffuse product arises. Simulating a QRD and MLS sequence the new Wavewood Diffusor is an ideal solution to those who search balanced sound ambiances that simultaneously control the exceeding energy in a room, flutter echoes, and still maintain a living and bright sound.

With the Wave Wood design a new diffuse product arises. Simulating a QRD and MLS sequence the new Wavewood Diffusor is an ideal solution to those who search balanced sound ambiances that simultaneously control the exceeding energy in a room, flutter echoes, and still maintain a living and bright sound. It is particularly effective in treating medium and high frequencies.

There are two versions of the panel: one with 44mm and another with 60mm of width. The first one is ideal for Music & Broadcast / Hi-Fi & Home Cinema and the second one to the Building & Construction sector.
