Creating effective and controlled diffusion within a particular design frequency has always been one of the greatest challenges facing acousticians. Vicoustic is proud to present the Poly Wood Fuser, a specially designed panel based on an optimal curve, which creates an elliptical diffuser to effectively scatter unwanted frequencies.

The panel's fibreboard elliptical membrane has a controlled density, allowing an infinite diffusion pattern (effective from 300Hz to 12 kHz), which breaks up standing waves and flutter-echo effects.

The panel's acoustic foam interior serves two purposes; dampening the membrane's diffusion effect and acting as a broadband absorber for medium low frequencies.

Creating effective and controlled diffusion within a particular design frequency has always been one of the greatest challenges facing acousticians. Vicoustic is proud to present the Poly Wood Fuser, a specially designed panel based on an optimal curve, which creates an elliptical diffuser to effectively scatter unwanted frequencies.

The panel's fibreboard elliptical membrane has a controlled density, allowing an infinite diffusion pattern (effective from 300Hz to 12 kHz), which breaks up standing waves and flutter-echo effects.

Main Info

Ref: B00011
EAN13: 5600217588923
HS-Code: 39211310
Dimensions: 597.0 x 597.0 x 130.0 mm
Scratch Resistance: No
Washable: No

Performance

Functionality: Diffusion
Absorption Frequency: Medium

Technical File

Absorption Class: E
alpha with Shape Indicators: 0.25 (L)
NRC: 0.350
Fire Class European (EN): Euroclass F
Fire Class France (NF P): M1

Shipping

Units Per Box: 6 boxes
Box Dimensions: 695.0 x 625.0 x 245.0 mm
Box Weight: 7.5 kg

Raw Materials

Material: Wood
Wood Type: Mdf Painted

Design

Wood Color: Nordik
Edges: Angled

Installation

Place: Wall
Fixing Type: Screwed

Technical File
