Anti-vibration wall mountings for partition walls. Designed to prevent structural transmission and provide maximum structural stability. Highly recommended for absorption of vibrations produced by airborne and impact noise. These units are a must in walls with sizable dimension.

**Advantages** The system combines specially designed materials and techniques allowing vibration reduction in both directions. It has a security system to prevent the complete collapse of the treatment in case of fire. **Characteristics** Suited for steel studs with dimensions: 48mm, 70mm, 90mm. **Installation** The first unit should be applied 1,50m from the floor. The second unit should be applied 3,00m from the floor. So on and so forth. The last unit should be applied between 10-30cm from the acoustic ceiling. Remember that the installation of the wall mountings should be in a criss-cross sequence (please see the installation procedure sheets).

## Main Info

Ref: B00485  
EAN13: 5600301841996  
HS-Code: 68069000

## Performance

Mounting Width: 48, 70 and 90mm  
Load Weight Range: 10.00 to 43.00 Kg

## Installation

Place: Wall  
Steel: Yes  
Fire Security Devices: Yes  
Plate Thickness: 0.8 mm

## Shipping

Units Per Box: 50 boxes  
Box Dimensions: 0.0 x 0.0 x 0.0 mm  
Box Weight: 0.0 kg
