These Bass Traps, sold in sets of four units per package, are considered to be one of the best optimized solutions when treating low frequencies. They are also an excellent complement to other acoustic products.

The unique shape of all the Bass Trap options allows you to minimize the dramatic effects that result from resonating waves, commonly associated with the "boomy" sound often heard in untreated rooms.

Super Bass 90 combines several techniques to treat low frequencies in a room. Using Vicoustic patented technology, these Bass Traps are the perfect complement to the Flexi Line absorption panels.

- Revolutionary design
- High efficiency absorption
- Easy to install

Applications:

Listening Rooms, Home Theaters, Recording and Broadcast Studios, Post Production Studios, Rehearsal Rooms, Conference and Teleconference Rooms, Lecture Halls, Distance Learning Rooms, Public Spaces, Auditoriums, Performance Spaces, etc.

Main Info

Ref: B00160
EAN13: 5600217588572
