Constructed from high quality EPS (Expanded Polystyrene), Pulsar Fuser DA2 represents an extraordinary compromise between price and quality. Designed to perform on high frequencies, the panels work exclusively on unidirectional fields, providing vertical or horizontal multi-reflection, especially when applied together in different positions, on back walls, side walls, or ceilings.

Pulsar Fuser panels achieve remarkable performance in Home Cinemas' sweet spots and stereo imaging, allowing you to experience a more defined sound. The panels are also adaptable to your room
