These Bass Traps, sold in sets of four units per package, are considered to be one of the best optimized solutions when treating low frequencies. They are also an excellent complement to other acoustic products.

The unique shape of all the Bass Trap options allows you to minimize the dramatic effects that result from resonating waves, commonly associated with the "boomy" sound often heard in untreated rooms.

Round Bass 360 Bass Traps use a classic and simple cylindrical design. They can also be easily covered with fabric if desired.

- Simple design
- High absorption efficiency
- Easy to install

Applications:

Listening Rooms, Home Theatres, Recording and Broadcast Studios, Post Production Studios, Rehearsal Rooms, Conference and Teleconference Rooms, Lecture Halls, Distance Learning Rooms, Public Spaces, Auditoriums, Performance Spaces, etc.
